

The **#statmathfamily** continues to search for traces and for this we need you as a
Junior Software Developer with focus on Backend-Development .NET
(m/f/d)

You can expect a young and highly motivated company, exciting projects in the areas of Industry 4.0, IIoT, business intelligence solutions and first-class development partnerships with international IT and software companies. In this open-minded environment, you will not only develop our products, but also yourself.

Your tasks:

- You work on our projects and have responsibility in our IT engineering team from the very beginning
- You ensure the reliable operation of individual products
- You support the backend development team (.NET Core)
- You take care of the deployment of our applications with software containers (Docker)
- You are the human interface between team frontend and team data science within the scope of projects
- You are enthusiastic about modern & team-oriented work in the scrum process

Your qualifications:

- Completed university studies in (business) informatics or completed apprenticeship as an IT specialist specializing in application development or a comparable degree
- Practical experience in the following areas: .NET Core Framework / C#, connecting databases (e.g. Postgres, Influx), handling version management (Git)
- Knowledge of working with Docker, Python and Angular/Typescript is desirable
- Reliable, independent and problem-solving oriented way of working
- The aspiration to constantly expand one's own knowledge and to remain up to date

Your benefits:

- Long-term prospects in a young, growing company and the associated opportunities for career advancement
- Exciting work environment in a forward-looking professional field with a high degree of independence
- Strategic partnerships with global players in the field of sensor technology and software
- A friendly, informal and open working atmosphere at all hierarchical levels
- Lots of varied experiences at regular company events
- Various offers in the area of company health management and occupational pension provision

Would you like to go on a search for traces with us?

Then we look forward to receiving your application!
