IT SENIOR SOFTWARE DEVELOPER / FRONT-END TEAM LEADER

1/2

As a pioneer in data science, we have been finding digital traces in the big data jungle since 2011. We are part of the ifm group of companies and contribute our expertise in the areas of data analysis, algorithms and software development to pave the way to become the leading provider of holistic IIoT solutions together with our international customers.

Together with your team, you will be involved in the further development of existing services, such as the DataScience Toolbox, as well as the design of new statmath and ifm products.

These are also your tasks:

- you will confidently lead, manage and further expand the two-person team in both a specialist and managerial capacity
- you will accompany and coordinate the entire process from the first idea in the concept phase to the finished product, contributing your own ideas
- you will act as an interface between the UI/UX and back-end teams
- staying hands-on, you will develop micro-service-based products with Angular 10 (update to Angular 14 will follow soon) using TypeScript

You like taking responsibility and accompanying all stages of the IT product development cycle from design to development and testing. And you have an eye for design. Then this job could be for you.

This is what you need for this job:

- several years of professional experience as a software developer (m/f/nb) specialising in front-end development
- very good skills in Angular/TypeScript, JavaScript, HTML5 and CSS3
- previous initial leadership experience is desirable but not mandatory
- professional working proficiency in German and excellent command of English are a prerequisite for this position
- willingness to spend the majority of your working time at our location in Siegen, Germany

This is what we offer to you:

- exciting tasks in the field of data science and artificial intelligence for industrial applications
- long-term prospects in a growing company and corresponding career opportunities
- a crisis-proof job and the security of the family-run ifm group of companies
- flexible working hours, a trust-based working time model and up to 50% work from home
- 30 working days of holiday plus additional company holiday from 27 to 31 December each year
- individual internal and external training opportunities for professional and personal development
- corporate health management: weekly company sports accompanied by a personal trainer and mental coaching as well as a gym at the SUMMIT, Siegen
- flexible choice of development tools (macOS or Windows) and provision of a business mobile phone (Apple)
- familiar working atmosphere and various team events
- modern, ergonomic workplaces
- cereal station, coffee, tea, water and juice during working hours
- staff canteen at the SUMMIT, Siegen
